

This week, FPA Sri Lanka marked a significant organizational milestone while continuing programme delivery across youth engagement, health services, and specialised training programmes.

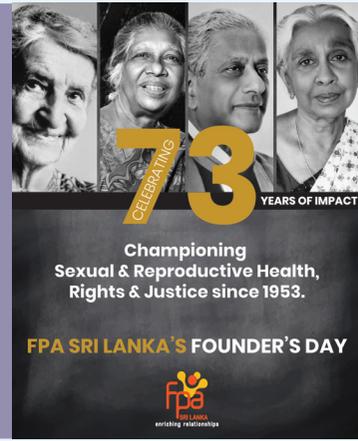

73rd Founder's Day | 15 January

This week, we proudly celebrated FPA Sri Lanka's 73rd Founder's Day, honouring the force that began and continues to power our organization.

We paid tribute to our volunteers, whose skills, time, and commitment have shaped our journey, alongside our staff and partners who carry this mission forward every day.

A **special video series** was launched featuring past Presidents, long-serving volunteers, staff members, and partner organizations, reflecting on FPA's legacy and shared commitment to Sexual and Reproductive Health, Rights and Justice.

When Young People Have the Right Information, They Make Informed Choices

Awareness programmes on SRH, STI & HIV prevention, and Gender-Based Violence were conducted at the Vocational Training Authority (VTA) centres in Baddegama and Koggala. These sessions were implemented through the IPPF SPRINT Emergency Response Project by FPA Sri Lanka's Koggala Service Delivery Point team.

The Social Marketing Programme launched SKYN Sri Lanka on TikTok, expanding digital outreach to younger audiences by combining education with purpose-driven social marketing.

A recent sexual health awareness **video** on erectile dysfunction reached over 1 million viewers on FB, highlighting the effectiveness of stigma-free digital engagement.
